

Tree Plantation at NSSes as Part of LEAFY LEGACY Drive Initiated by MPHSS

Overview

On Tuesday, 22nd October 2024, NSSes was honored to host teachers and students from Mari Petroleum Higher Secondary School (MPHSS) as part of their Leafy Legacy Drive. This initiative involved both schools' students, including our students with disabilities, promoting inclusivity in line with NSSes's commitment to an inclusive and participatory learning environment.

Orientation Visit

Upon arrival, our visitors were welcomed and taken on an orientation visit of NSSes. During this time, they were introduced to our students and had a brief opportunity to interact in various classrooms, fostering camaraderie and connection.

Tree Plantation Ceremony

The main event of the day was the tree plantation activity conducted in the school lawn. This collaborative effort between MPHSS and NSSes students reinforced the importance of environmental responsibility. Our students engaged actively in planting the trees and learned about the specific plants involved in this initiative, enriching their knowledge of nature and sustainability.

Educational Session on Plantation

As part of the event, students were provided with educational information about each type of plant they were planting. This session served to deepen their understanding of the environment and instill a greater appreciation for ecological conservation.

Conclusion and Departure

The event concluded with a group photograph of all participants to commemorate this meaningful day. The visitors departed at 10:00 am, leaving a lasting impact not only through the planted trees but also through the inspiration and unity shared with our students.

Thank You
